REPORT OF TAX COMMISSION.

Department of North Carolina Corporation Commission,
Raleigh, N. C., December 13, 1904.

His Excellency, Charles B. Aycock,
Governor of North Carolina,
Raleigh, North Carolina:

Sir:—We hand you herewith the Annual Report of the State Tax Commission. As the next session of the Legislature is so near, we have taken the liberty of incorporating in this report the matter which we are required by law to report to the Legislature at each session, so that this report would answer the purpose of both.

Each county in the State was visited during the year 1903 by at least one member of the Board. As this was the year for assessment of all property, we arranged to meet and confer with the Boards of List-takers and Assessors in each county in the months of April, May and June. We prepared a pamphlet for the instruction of list-takers and assessors, explaining the proper working of the tax laws of the State and calling particular attention to points in the administration of the laws which have seemed to be overlooked, advising list-takers and assessors, and explaining points which seemed to be intricate and upon which assessors might differ. Copies of this letter were furnished to each assessor and list-taker.

In addition to this, we replied to numerous letters, enquiring as to application of Machinery and Revenue Act to particular facts.

We required the Registers of Deeds, Clerks of Courts, Mayors and Clerks of towns in this State to make reports to us on forms furnished by this department to ascertain the assessed valuations of all property listed for taxation throughout the State under the Machinery Act, the amount of taxes assessed, collected and returned delinquent, and other matters concerning which we are required to report. From these reports twenty-two tables have been prepared, which are published herewith, which will show among other things the whole amount of taxes collected in the State for all purposes, classified as to State, county, township and municipal purposes, with the sources thereof and the amount lost.

From these tables it appears that the number of polls listed in 1903 was 273,838, against 267,057 for the year 1902. The total assessed value of all property in the State for the year 1903 was $433,372,939; the increase in this assessment over 1899, which was the last general assessment, was $142,103,381, the total assessment for the latter year being $291,269,558. The increase over the year 1900 was $132,663,639, the total assessment for that year being $300,709,300. The increase over assessment of 1901 was $92,150,-930, the total assessment of that year being $341,229,009. The increase in assessment over the year 1902 was $86,494,016, the total assessment being $346,878,923.

This increase of the year 1903 over the year 1902 was distributed among more important classes of property, as follows: Lands, $24,901,326; town lots, $16,509,194; personal property, $18,131,-618; and railroads, $25,506,378.

Incomes listed for taxation were $2,350,750, against $926,144 in 1900. Total taxes levied on polls and property for the year 1903 for State purposes was $910,083; pension purposes, $206,209; county purposes, $1,274,935; school purposes, $2,135,632, making a total of $4,526,859. Of this amount $198,724 was uncollected; 34,984 polls listed for taxation failed to pay.

The total tax levy on polls and property for municipal purposes was $1,385,108, and of this amount $125,725 was uncollected. Of this last amount $67,453 was levied on property and $57,772 on polls. The causes assigned for the loss are mistakes and errors in listing; and as to polls and personal property, that such tax-payers are insolvent or dead or removed out of the jurisdiction. This is not sufficient explanation of so much loss. It is not practicable for us in this report to go into details of each county or municipality. The data in this and our former reports will enable any one interested to investigate the loss in the working of revenue laws in each county and municipality. Investigation and comparison will show that in some counties and muncipalities there is very little uncollected taxes and in others a very considerable part not collected. In one municipality at the end of the fiscal year over twenty per cent. of the tax levied on property and polls was uncollected. This means that four-fifths of polls and property is paying the tax for the other one-fifth. Stricter

laws for enforcing collection of taxes should be passed, especially as to tax collectors in municipalities. There is no reason why they should not be held to a strict accountability as sheriffs in the collection of State and county taxes.

In Purnell against Page, 133 N. C., page 125, it was decided by our Supreme Court that Federal officers could not be required to list their salaries as income, under our laws. This principle necessarily exempted incomes from United States bonds and other United States securities. We accordingly instructed list-takers not to require incomes from these sources to be listed.

There are *dicta* in this opinion to the effect that State judges and certain other State officers cannot be required to list their salaries as incomes. There was no question in the record as to these last salaries and no facts upon which a decision could be based. The only question presented by the record was whether our statute was in violation of express or implied provisions of the Constitution of the United States. By reference to the opinion it will appear that the *dicta* has reference to the abstract question of the right of the General Assembly to pass a law diminishing salaries of judges. It was thus assumed that the judges of the State were all elected and inducted into office before the passage of the income tax law. If the Court had had the facts of any particular income before it, we believe the *dicta* would have been different. If the Court had discussed the question as to whether a judge who had been elected and inducted into office after the passage of the income tax law could resist the payment of the tax on the ground that his salary had been diminished, we have no doubt that the decision would have been different from the *dicta*. The Constitution, Art. IV, sec. 18, provides: "The General Assembly shall prescribe and regulate the fees, salaries and emoluments of all officers provided for in this article; but the salaries of the judges shall not be diminished during their continuance in office." This article provided for judges of Supreme and Superior Courts, clerks of Supreme and Superior Courts, and other officers, so that it will be seen that the General Assembly has power to increase or diminish the salary of a judge, subject to the one limitation—it must not be diminished "during continuance in office."

Our present income tax law was passed March 15, 1901. This act

was not repealed by Act of 1903; it was amended in certain particulars by the latter act, but not as to the income tax.

It is a matter of common knowledge that the majority of the judges presiding in the Courts of the State during the years 1903 and 1904 were elected in 1902 and inducted into their office in 1903; so that, if the income tax law was a diminution of the salary prescribed by the General Assembly for judges by The Code, secs. 3733 and 3734, the diminution occurred before the judges entered upon their office and not "during continuance in office," and, therefore, the section of the Constitution above quoted was not violated.

We have had an income tax law in much the same form as the present ever since 1868. In addition to this, the Constitution, Art. V, sec. 3, expressly authorizes the General Assembly to tax all incomes except such as are derived from property which is taxed. Under these circumstances, we did not feel at liberty to instruct the list-takers to disregard the plain mandate of the General Assembly, and accordingly we instructed them to require all such salaries to be listed. We thought it proper to bring to the attention of your Excellency and the General Assembly our action in the matter, so that such action might be taken as may be deemed proper in the premises. We are pleased to say that we have been informed that all of the executive officers and most of the judges listed their salaries. We are not officially informed that any of the judges refused to do so.

As appears from tables in this and our former reports, the income tax is an important and growing source of revenue.

RECOMMENDATIONS.

We renew the recommendations contained in our first annual report, as follows:

First. There should be an exemption of personal property from taxation of $300 instead of $25, as the law now provides. The Constitution authorizes the General Assembly to exempt this amount of property. See Art. V, sec. 5.

Second. That the poll tax levied under Art. V, secs. 1 and 6, of the Constitution be not permitted to exceed $2 on the head. This recommendation is made because the Constitution limits it to this sum. See Art. V, sec. 1; opinion by Judge Rodman, Appendix to

66 N. C. Reports, and Williams against Commissioners, 119 N. C. Reports, page 520. And experience has demonstrated that this is as much as those liable for it have ability to pay.

We have already called attention to the fact that 34,980 out of the 273,838 polls listed for the year 1903 were insolvent. We think it proper to call the attention of the General Assembly to the fact that the statutes authorizing county commissioners to exceed $2 on the poll, usually if not universally, authorize the excess to be applied to other purposes than of education and the support of the poor, and that this appropriation of the poll tax seems to be in conflict with Art. V, sec. 2, of the Constitution, which provides: "The proceeds of the State and county capitation tax shall be applied to the purposes of education and the support of the poor, but in no one year shall more than twenty-five per cent. thereof be appropriated to the latter purpose." If three-fourths of the whole poll tax levied for State and county purposes had been applied to education, there might not have been the necessity for appropriating $100,000 for the purpose of making four-months terms in school districts in the State.

Third. That laws authorizing cities and towns to levy poll tax for municipal purposes be repealed. As pointed out in our first annual report, the State and county municipal poll tax levy in some of the cities and towns in the State amounts to more than six dollars per head. No parallel can be found for it in any State in the Union. The tax was levied under the misapprehension that the Constitution required the same equation and proportion to be observed in levying taxes for municipal purposes as was required to be observed in levying taxes for State and county purposes. We called attention in our first report to the fact that this was a misapprehension, and cited Jones against Commissioners, 107th N. C., 258, as settling this question. In a case at the present term of the Supreme Court the question was again presented to the Court and the same conclusion reached as in Jones against Commissioners, so that there cannot be a doubt as to the power of the General Assembly to pass such a law.

One town in the State (the town of Spencer) undertook to give relief from this oppression and reduced the tax on polls to fifty cents on the head, and it was from the tax levy in this town that the case next above cited sprung. We have no doubt that other towns and

cities will follow this example, but we believe it will be better to have general legislation upon the subject.

Fourth. That statutes be not passed for the purpose of authorizing a higher tax rate than sixty-six and two-third cents on the one hundred dollars value for State and county purposes combined. We are glad to say that twenty-one of the counties have a tax rate of sixty-six and two-third cents and less, while only eighteen counties could say this in the year 1902.

We make this recommendation because we think this is the limit under our Constitution, Art. V, sec. 1. In the opinion cited, *supra*, Judge Rodman says: "Clearly it is the duty of the Legislature, in its revenue acts, to observe the equation of taxation and to keep the State tax not only within the extreme limit, but also so much within it as to allow the counties by an additional tax also within it to provide for their legitimate needs." See also, Williams against Commissioners, cited *supra*.

We make this recommendation also because we believe sixty-six and two-third cents on the one hundred dollars value is as high as many classes of property will bear for taxation for State and county purposes. It would seem that this ought to be practicable now, in view of the great increase in valuations in the State, and that sufficient revenue could be raised within constitutional limits.

The State debt is $6,831,270, part of which bears six per cent. and part four per cent. interest. The State has income from other sources than taxation about sufficient to liquidate interest on this indebtedness. The tax levy on property for State and pension purposes was $216,235 more in 1903 than in 1902, the increased assessment being $86,494,016; and the tax levy on property for schools on same increase is $155,687, and over tax levy of 1900 for State and pension purposes, $331,659, and school purposes, $238,794. Unless appropriations are increased and unless the State's income from other sources is diminished, it would seem practicable to reduce this tax rate. The State's income has been increased. The income tax is increased, as we have seen.

The inheritance tax yielded revenue in 1902, $4,240; in 1903 it was $12,578. We are informed by the State Treasurer that it was $16,000 in 1904. North Carolina was one of the first States to adopt

this form of taxation. We think it should be extended to lands as well as personal property, and if properly enforced it will be a source of much revenue.

We think it should be made the duty of the solicitors to enforce the collection of this tax for a certain per cent. of the amount collected. They visit all of the counties two or more times each year and could attend to this work. The present method of employing special counsel in each case is expensive and inefficient.

The tax under "B" and "C" Schedules on Insurance Companies has greatly increased under the able management of that department by the present Commissioner.

The Penitentiary, under its excellent management, has become a revenue-earner and does not longer need appropriations.

The tax rate in 1904, we learn from reports from counties, was in 22 counties within the limit of sixty-six and two-third cents; so that increase in assessments has already enabled counties to reduce their tax rate to some extent. The total debt of counties is $2,514,580. Thirty of the counties of the State do not report any debt. The State now collects through the counties, under Schedules "B" and "C," about $158,000, and some additional revenue under these schedules is paid to the State Treasurer directly.

We think that all of the revenue derived from "B" and "C" Schedules, excepting that on franchises, liquor distilleries and insurance companies, should be distributed in some proportion between schools, counties and municipalities, leaving the tax for school purposes as at present. Imposing tax on lawyers, physicians, merchants, etc., for the privilege of doing business in certain localities in the State, for the purpose of revenue for the State, can only be justified on the ground of dire necessity. These taxes are local and should be so applied.

Fifth. That the municipal tax rate be so limited that when added to State and county tax rate upon property it will not be confiscatory of any class of property. The combined tax rate is as much as $2.50 on the $100 in some of the municipalities. It is not worth while to reason that this is more than many classes of property can bear, assessed at its true value in money.

The total indebtedness of municipalities in the State is $6,654,238.

Property listed in municipalities is $128,204,299. There was levied in 1903 $1,725,374 taxes for these municipalities. Of this sum $1,281,947 was levied on property and $103,161 on polls, the other revenue being derived from dispensaries, saloons, fines and other sources.

For the city of Asheville there was a levy of $129,205. According to the census of 1900, its population was 14,694 which is over $8 per capita.

Charlotte—levy, $126,345; population, 18,096, which is nearly $7 per capita.

Durham—levy, $135,680; population, 14,440, which is $9 per capita.

Greensboro—levy, $85,904; population, 10,025, which is $8.50 per capita.

Raleigh—levy, $93,045; population, 13,643, which is $6.75 per capita.

Wilmington—levy, $208,463; population, 20,976, which is $10 per capita.

There was an increase in assessment of town property in 1903 over 1902 of $261,352. Increased assessments has enabled several municipalities to reduce their tax rates to some extent.

If taxes levied under "B" and "C" Schedules were left to be divided between counties and municipalities, as suggested above, and if the suggestion hereinbefore made be adopted of passing laws which will secure the collection of such tax as is levied for municipal purposes, the present *ad valorem* tax rate could be very materially reduced.

From reports received from the counties we are enabled to give the total valuation of all property for the year 1904 as compared with the valuations for the year 1903, but the reports were received too late to be tabulated for this report.

The total valuation of all property for the year 1904 is $443,232,781, an increase of $9,859,843 over the year 1903. Of this increase in valuation, real estate shows $1,123,691; personal property, $7,232,691.

Incomes for the year 1904 show $2,454,204, an increase of $97,451 over the year 1903.

Our Constitution, as construed by our Supreme Court, requires that when any property is taxed for State, county, city or town or township purposes, all property must be taxed *ad valorem* and at the same rate. The result is that in municipalities all property is subjected to taxes for State, county and city or town purposes, and sometimes also township purposes. Under the working of this law, which has been termed "the benign principles of uniformity and equality in taxaton," we have practically confiscation of certain large and important classes of property if the law is enforced. In order to prevent this, we believe it will be necessary to follow the example of the State of Virginia by amending our Constitution so as to confer upon the General Assembly the power to segregate for the purposes of taxation the several kinds or classes of property so as to specify and determine upon what subjects State taxes and upon what subjects local taxes may be levied.

Our thanks are due the clerical force of this department for faithful work. The tables are prepared under the supervision and direction of Mr. H. C. Brown, chief clerk.

Respectfully submitted,

Franklin McNeill,
Chairman;
Sam. L. Rogers,
E. C. Beddingfield,
Commissioners.

STATEMENT No. 1—*Showing Number of Acres and Value of Land, Timber and Quarry Interests, Number and Value of Town Lots, Total Value of Real Estate, Number and Value of Domestic Animals, Various Classes of Personal Property and Value, Total Value of Personal Property, Total Value of Real Estate and Grand Total of Real and Personal Property. Also Total Amount of Incomes Listed for Taxation in Counties of the State for the Year 1903. Compiled from Returns on File in this Office.*
